Mandaue, Cebu | +639-833-1786 | <https://github.com/quivus>

PROFESSIONAL SUMMARY

Innovative Computer Science student specializing in **frontend development** for web and mobile applications. Skilled at designing sleek, minimalist interfaces that adapt seamlessly to diverse user needs, with expertise in **Canva** for rapid prototyping and translating designs into interactive user experiences. Dedicated to continuous learning in coding and modern design trends, with a strong drive to bring new ideas to life. Seeking an internship to apply technical expertise, creativity, and adaptability in building impactful digital solutions.

TECHNICAL SKILLS

Development: TypeScript, Java, Dart, React, Next.js, Vue.js, Flutter

Design: Figma (UI/UX Prototyping), Canva (Visual Branding/Layouts)

AI-Augmented Workflow: VS Code, GitHub Copilot, Claude Code

PROJECT EXPERIENCE

Patient Tracker System

Academic Project

- Developed a multi-platform tool for school nurse that utilizes NET 8, ASP.NET Core Web API, and Dapper to manage patient medical records, and medicine inventory.
- Integrates Vue 3, Vite, Pinia, and Tailwind CSS for the web interface, while using Flutter and Dart for mobile access.
- Connects web, mobile, and ESP32 IoT hardware (C/C++) to capture health data and trigger real-time emergency alarms to both nurse and student device.
- Uses SQL Server to provide a secure, digital form of medical documentation for the clinic.

CSO Finance

Personal Project

- Built with Flutter, this application provides organizational financial transparency and accountability for the Computer Studies Organization.
- Features a real-time dashboard and role-based access to manage organizational funds, automated budget allocation, and expense tracking.
- Includes functionality to store receipt images along with specific dates, times, and officer identification for every transaction.

Gratitude Capsule

Personal Project

- Developed as a cross-platform, offline-first application using Flutter, React, and Firebase for note management and time-locking.
- Supports real-time data synchronization for access across multiple devices under a single account.
- Uses Lottie animations and live countdowns to create smooth, engaging note-reveal experiences for users.

Officer ID Creation

Graphic and Design Committee (GAD) Activity

- Designed the official ID layout for **Computer Studies Organization (CSO) 2024-2025** officers.
- Used **Canva** to manage branding and asset production for professional presentation.

LEADERSHIP EXPERIENCE

Auditor — Computer Studies Organization

ACLC College of Mandaue

- Oversaw financial records and reporting, ensuring transparency and accountability in all transactions.
- Managed organizational funds responsibly, enabling smooth operations and well-planned activities with sustainable budgets that supported student initiatives.

Class Mayor

- Consistently elected from 1st to 4th year to represent the class, coordinate with faculty, and manage class activities, fostering a positive academic environment and ensuring well-organized budgets for student initiatives.

EDUCATION

ACLC College of Mandaue

Expected 2027

Bachelor of Science in Computer Science
